Promote best practices
Here are our recommendations and best practices for utilizing the power of Promote:

First, awareness — drive traffic to your page.

Then, use Promote for Others and LIVES to diversify your content and grow your audience.

Finally, boost your sales!
Amplify your presence

Promote boosts your brand, establishing your story and increasing awareness.

Why create an ad from scratch?
Use Promote to make one of your top-performing videos go the extra mile.

How do I start?

1. Choose a video
Choose videos that have already performed well (with a high number of likes, comments or shares).

2. Set an ad group
In the early stages, we recommend using [More video views]/[More LIVE views] to drive traffic and engagement.

3. Set your targeting
If you have a limited budget and are uncertain about your audience persona, use TikTok’s default audience suggestion for broader reach.
Grow your audience

Next, use Promote to build your audience and grow your followers. Get that loyal customer base!

How do I start?

1. Go for variety
   Choose a few videos or LIVEs with varied content to attract people with different interests.

2. Mix and match objectives
   A. Select different Promote objectives with different videos.
   B. Keep an eye on your data and experiment to see what works best.

3. Work around your budget and targeting
   Gradually expand ad duration to grow your presence. Test different interest targeting combos to find customers.
Drive more sales

Once you've grown your account, established your audience base, and set up your TikTok Shop or store website, it's time to focus on increasing sales and revenue with Promote.

How do I start?

1. **Ad objective selection**
   - **For online businesses**: Drive traffic directly to your own website and gain new customers with [More website visits]. Target higher-intent customers with lower-funnel conversions.*
   - **For TikTok Shop sellers**: Boost sales with [More product purchases], which can be used via video or LIVE.

2. **Targeting options**
   If you already know your target customer demographic, try using different targeting combinations, including gender, age, interest and geographic targeting, to attract more potential customers.

   *Available in Q2 with TikTok Ads Manager integration.
02 Promote best practices

**Bonus pro tips**

- **Try a longer Promote period** (≥3 days or more) for the best results (with sufficient budget).

- **Use Promote at least once a week** to keep your momentum going.

- **Review your performance data report** for opportunities to improve your campaigns.
